Policy of the Journal and Instructions to Authors. Amendments (1974). 1

Proteins

The evolutionary stability of cytochrome *c*-551 in *Pseudomonas aeruginosa* and *Pseudomonas fluorescens* biotype C.
By R. P. Ambler 3

The release of iron from horse spleen ferritin to 1,10-phenanthroline.
By T. G. Hoy, P. M. Harrison, M. Shabbir & I. G. Macara 67

The molecular weight of J chains derived from human immunoglobulin M.
By M. J. Ricardo, Jr., J. M. Brewer & F. P. Inman 71

The incorporation of J chain into reassembled human immunoglobulin M.
By M. J. Ricardo, Jr. & F. P. Inman 79

The amino acid sequences of cytochrome *c* from four plant sources.
By R. H. Brown & D. Boulter 93

Chymotryptic inhibitor I from potatoes. The amino acid sequence of subunit A.
By M. Richardson 101

A temperature-jump study of the reaction between azurin and cytochrome *c*-551 from *Pseudomonas aeruginosa* (*Short Communication*).
By M. Brunori, C. Greenwood and M. T. Wilson 113

Haemoglobin catabolism: the role of ferrihaems in studies of the degradation pathway (*Short Communication*).
By N. A. Brown, R. F. G. J. King, M. E. Shillcock & S. B. Brown 135

Nucleic Acids

A simplified method for preparing sucrose gradients (*Short Communication*).
By A. B. Stone 117

Carbohydrates

Distribution of sulphate and iduronic acid residues in heparin and heparan sulphate.
By M. Höök, U. Lindahl & P.-H. Iverius 33

PAGE

Enzymology

An enzyme-bound intermediate in the biosynthesis of 3-hydroxy-3-methylglutaryl-coenzyme A.
By B. Middleton & P. K. Tubbs 15

Preparation of some immobilized linked enzyme systems and their use in the automated determination of disaccharides.
By D. J. Inman & W. E. Hornby 25

Regulation of 'malic' enzyme of *Solanum tuberosum* by metabolites.
By D. D. Davies & K. D. Patil 45

Inhibition of enzymes by metal ion-chelating reagents. Theory and new graphical methods of study.
By W. G. Bardsley & R. E. Childs 55

Inhibition of enzymes by metal ion-chelating reagents. The action of copper-chelating reagents on diamine oxidase.
By W. G. Bardsley, R. E. Childs & M. J. C. Crabbe 61

Guanine deaminase inhibitor from rat liver. Isolation and characterization.
By S. Ali, A. Sitaramayya, K. Sree Kumar & P. S. Krishnan 85

Involvement of the superoxide anion in sulphoxidation (*Short Communication*).
By K. Prema & K. P. Gopinathan 119

The molecular form of acetylcholinesterase as determined by irradiation inactivation (*Short Communication*).
By S. R. Levinson & J. C. Ellory 123

Enzyme purification by hydrophobic chromatography: an alternative approach illustrated in the purification of aspartate transcarbamoylase from wheat germ (*Short Communication*).
By R. J. Yon 127

Difference in kinetic properties between hexokinase type I isoenzymes from various rat tissues with reference to the effect of a thiol inhibitor (*Short Communication*).
By T. Kamikashi, H. Kizaki, K. Murakami & S. Ishibashi 139

PAGE

A simple graphical method for determining the inhibition constants of mixed, uncompetitive and non-competitive inhibitors (*Short Communication*).
By A. Cornish-Bowden 143

PAGE

General Methods

A rapid method for collecting and assaying gradient fractions for radioactive macromolecules (*Short Communication*).
By L. Rubinstein & A. Rein 131

Contents of Volume 137, No. 2

PAGE

Proteins

The interaction of the calcium-binding protein (troponin C) with bivalent cations and the inhibitory protein (troponin I).
By J. F. Head & S. V. Perry 145

Triose phosphate isomerase from the coelacanth. An approach to the rapid determination of an amino acid sequence with small amounts of material.
By E. Kolb, J. I. Harris & J. Bridgen 185

A low-molecular-weight protein cross-reacting with human liver *N*-acetyl-β-D-glucosaminidase.
By M. Carroll & D. Robinson 217

Separation at neutral pH value of ^{32}P-labelled proteins in a membrane preparation from ox brain. Partial characterization of a component of the sodium-plus-potassium ion-activated adenosine triphosphatase.
By D. R. Alexander & R. Rodnight 253

Thiol groups of normal immunoglobulin G.
By B. M. Buchwald & G. E. Connell 281

A study of the reaction of protoporphyrin IX with human globin.
By A. Treffry & S. Ainsworth 319

A study of the properties of two porphyrin-globin species formed in the reaction of protoporphyrin IX with human globin.
By S. Ainsworth & A. Treffry 331

A study of the properties of hybrids of oxyhaemoglobin and deoxyhaemoglobin with two porphyringlobin species.
By A. Treffry & S. Ainsworth 339

Isolation of nuclear acidic proteins from rat tissues. Characterization of acetylated liver nuclear acidic proteins.
By D. Suria & C. C. Liew 355

PAGE

Dihydrofolate reductase: low-resolution mass-spectrometric analysis of an elastase digest as a sequencing tool (*Short Communication*).
By H. R. Morris, K. E. Batley, N. G. L. Harding, R. A. Bjur, J. G. Dann & R. W. King 409

Fluorescence studies of protein–sterol relationships in human plasma lipoproteins (*Short Communication*).
By R. J. M. Smith & C. Green 413

Nucleic Acids

Further investigation of the increased transfer ribonucleic acid methylase activity in tumours of the mouse colon.
By A. E. Pegg & A. M. Hawks 229

Sites of methylation of purified transfer ribonucleic acid preparations by enzymes from normal tissues and from tumours induced by dimethylnitrosamine and 1,2-dimethylhydrazine.
By A. E. Pegg 239

The fractionation of adenosine-rich oligoribonucleotides on polyethyleneimine-cellulose.
By J. Crossley, J. Mansbridge & R. Williamson 299

The molecular basis for biological inactivation of nucleic acids. The action of methylating agents on the ribonucleic acid-containing bacteriophage R17.
By K. V. Shooter, R. Howse, S. A. Shah & P. D. Lawley 303

The reaction of alkylating agents with bacteriophage R17. Biological effects of phosphotriester formation.
By K. V. Shooter, R. Howse & R. K. Merrifield 313

PAGE

Lipids

Physicochemical properties of low-density lipoproteins of normal human plasma. Evidence for the occurrence of lipoprotein B in associated and free forms.
By D. M. Lee & P. Alaupovic 155

Chemical and biochemical studies on 18-hydroxyoestrone.
By J. K. Findlay, L. Siekmann & H. Breuer 263

Influence of an 18-hydroxyl group on the interaction of oestrogens and hydroxy steroid oxidoreductases.
By J. K. Findlay & H. Breuer 273

Carbohydrates

The action of nitrous acid on C-teichoic acid (C-substance) from the walls of *Diplococcus pneumoniae*.
By M. J. Watson & J. Baddiley 399

Small Molecules

Gas–liquid-chromatographic determination of light-dependent acetylcholine concentrations in moss callus.
By E. Hartmann & H. Kilbinger 249

Enzymology

Mössbauer spectroscopy of the nitrogenase proteins from *Klebsiella pneumoniae*. Structural assignments and mechanistic conclusions.
By B. E. Smith & G. Lang 169

Reactivity of the active-centre lysine residue of rabbit muscle aldolase.
By P. J. Anderson & H. Kaplan 181

Effect of pH, ionic strength and univalent inorganic ions on the reconstitution of aspartate aminotransferase.
By L. Gianfreda, G. Marino, R. Palescandolo & V. Scardi 199

PAGE

Studies on partially reduced mammalian cytochrome oxidase. Reactions with carbon monoxide and oxygen.
By C. Greenwood, M. T. Wilson & M. Brunori 205

Human placental cathepsin B1. Isolation and some physical properties.
By A. A. Swanson, B. J. Martin & S. S. Spicer 223

Structural features of ring C of 20-oxo steroids and the interaction with cortisone reductase.
By I. H. White & J. Jeffery 349

Mannosidosis in Angus cattle. The enzymic defect.
By N. C. Phillips, D. Robinson, B. G. Winchester & R. D. Jolly 363

A specific collagenase from rabbit fibroblasts in monolayer culture.
By Z. Werb & M. C. Burleigh 373

Cathepsin B1. A lysosomal enzyme that degrades native collagen.
By M. C. Burleigh, A. J. Barrett & G. S. Lazarus 387

The reaction of diethyl pyrocarbonate with pyruvate kinase (*Short Communication*).
By L. G. Dann & H. G. Britton 405

Intermolecular Organization

Thermostability of mammalian brain ribosomes and the effects of nucleoside triphosphates on their heat-sensitivity.
By B. K. Grove, T. C. Johnson & B. E. Gilbert 291

Contents of Volume 137, No. 3

PAGE

Nomenclature for vitamins B-6 and related compounds. Recommendations (1973).
By IUPAC–IUB Commission on Biochemical Nomenclature (CBN) 417

PAGE

Proteins

Observations on the use of solid-phase-coupled antibodies in the radioimmunoassay of human placental lactogen.
By J. Gardner, G. Bailey & T. Chard 469

PAGE

An amino acid sequence in the active site of lipoamide dehydrogenase from pig heart.
By J. P. Brown & R. N. Perham 505

The organization of the major protein of the human erythrocyte membrane.
By D. H. Boxer, R. E. Jenkins & M. J. A. Tanner 531

The binding of sodium dodecyl sulphate to bovine serum albumin at high binding ratios.
By G. Allen 575

Differential anion effects on thermal stability of collagen in the dispersed and aggregated states (*Short Communication*).
By A. E. Russell 599

Nucleic Acids

Studies on the form and synthesis of messenger ribonucleic acid in the rat ventral prostate gland, including its tissue-specific stimulation by androgens.
By W. I. P. Mainwaring, P. A. Wilce & A. E. Smith 513

Chromatography of transforming deoxyribonucleic acid on methylated albumin and by gel filtration.
By G. R. Barker & P. Hodges 543

Carbohydrates

The type-specific substance from *Pneumococcus* type 33B (*Short Communication*).
By M. J. Watson 603

Small Molecules

Porphyrins in egg shells (*Short Communication*).
By T. K. With 597

Enzymology

Properties and substrate specificity of some reactions catalysed by a short-chain fatty acyl-coenzyme A synthetase from seeds of *Pinus radiata*.
By O. A. Young & J. W. Anderson 423

The enzymology of short-chain fatty acyl-coenzyme A synthetase from seeds of *Pinus radiata*. Kinetic studies and a proposed reaction mechanism.
By O. A. Young & J. W. Anderson 435

Curves of ligand binding. The use of hyperbolic functions for expressing titration curves.
By H. B. F. Dixon 443

myo-Inositol dehydrogenase(s) from *Acetomonas oxydans*. Optimization of conditions for solubilization of membrane-bound enzyme.
By W. J. Criddle, J. C. Fry & M. M. Keaney 449

PAGE

The mechanism of phosphoglucomutase from *Micrococcus lysodeikticus*.
By J. B. Clarke & H. G. Britton 453

Preparation and properties of a phosphoenzyme from the phosphoglucomutase of *Micrococcus lysodeikticus*.
By J. B. Clarke, M. Birch & H. G. Britton 463

The purification and specificity of a neutral endopeptidase from rabbit kidney brush border.
By M. A. Kerr & A. J. Kenny 477

The molecular weight and properties of a neutral metallo-endopeptidase from rabbit kidney brush border.
By M. A. Kerr & A. J. Kenny 489

Substrate specificity of an α-amino acid ester hydrolase produced by *Acetobacter turbidans* A.T.C.C. 9325.
By T. Takahashi, Y. Yamazaki & K. Kato 497

The effect of acetyl-coenzyme A on phosphate-activated glutaminase from pig kidney and brain.
By E. Kvamme & I. Aa. Torgner 525

Regulation of muscle phosphorylase *b* kinase activity by inorganic phosphate and calcium ions.
By B. Sacktor, N.-C. Wu, O. Lescure & W. D. Reed 535

The purification of bovine cathepsin B1 and its mode of action on bovine collagens.
By D. J. Etherington 547

Amino acid sequence of a peptide containing the active cysteine residue of histidine ammonia-lyase.
By H. Hassall & A. K. Soutar 559

Affinity labelling of proteinases with tryptic specificity by peptides with *C*-terminal lysine chloromethyl ketone.
By J. R. Coggins, W. Kray & E. Shaw 579

Electron-paramagnetic-resonance studies on cobalt(II) carbonic anhydrase. Low-spin cyanide complexes.
By S. A. Cockle 587

Intermolecular Organization

The phospholipid-dependence of uridine diphosphate glucuronyltransferase. Effect of protein deficiency on the phospholipid composition and enzyme activity of rat liver microsomal fraction.
By A. B. Graham, B. G. Woodcock & G. C. Wood 567
